Webpack / Vite
AstroJS
Cypress

Profile

I have worked at a few organizations since 2020 either as a web front-end engineer or a full-stack developer. During the early days of my career, creating interactive front-end animations was my biggest passion, but it was not until later that I realized what truly makes a great web app is a powerful server. Becoming a versatile JavaScript full-stack developer has been my main career focus since then, which means I'm always studying Node.js when I don't work.

Employment History

Full Stack Web Engineer / Design (Remote), Ilwol HaedalByul, Bundang, South Korea

AUGUST 2023 – PRESENT

- Built and maintained a booking website for fortune-telling & mental-care service using MERN stacks. (ilwolbooking.com).
- Frequently discussed with the business owner on the Design/UX and various features in the admin pages.
- Implemented the front-end state management for the user-flow using **Redux**
- Created the Restful APIs for CRUD operations to **mongoDB** as well as integrating third party web-services using **Node/ExpressJS** (e.g. Google Calendar API, Web SMS service)

Front-end Web engineer (Remote), okTurtles Foundation Inc., Miami, Florida, the US

JUNE 2022 – PRESENT

- Build and maintain the front-end of various high-quality websites and web-applications of the company using various front-end technologies (**Vue.js / React.js / Typescript / SASS, CSS / HTML5 / Cypress / Astro**).
- Closely collaborating with other teams at the company (Design / Backend / Project manager) and writing the end-to-end test-suites for the complex web-app named 'Group Income'.
- Worked on implementing advanced modern front-end technologies like **PWA** and **Websockets**.
- Worked on converting the entire source-code of outdated projects into a modern **AstroJS** websites.

Front-end web engineer, Heartland Bank LTD, Auckland, New Zealand

APRIL 2020 – PRESENT

- Worked on various **Vue2 & Vue3** projects of the company. Mainly maintained two hybrid mobile-apps built using **VueJS** and **CapacitorJS** (Heartland NZ mobile-app and Heartland Finance app).
- Closely collaborated with other teams at the organization such as, Design / UX, Back-end, QA and the project manager. Main tasks have been implementing the Figma design mock-ups and integrating the delivered Restful APIs in the front-end.
- Was a main developer of the two times of app-wide design-refresh projects in NZ mobile-app. (Release V2.0.0 in 2021 and Release V4.0.0 in 2024)
- Have been receiving the salary increase **every year** since joining.

Education

**Bachelor of Applied Science in Chemical Engineering, Hanyang University,
Seoul, South Korea**

MARCH 2010 – JULY 2025

Studied Chemical Engineering.
