Profile

I started my front-end web developer career in April 2020. After exploring various aspects of web front-end development over 2-3 years, I started teaching myself server-side development with NodeJS. I began my full-stack engineer career in mid-2023.

Employment History

Full Stack Web Engineer (Remote), Ilwol HaedalByul, Bundang, South Korea

AUGUST 2023 – PRESENT

- Ilwol haedalbyul is a mental-care counseling business located in Bundang, South Korea. I built and launched an online booking website for it (ilwolbooking.com).
- I worked on every part of the web service (design/front-end/back-end) using **MERN Stack**. In details, the **front-end** is a **ReactJS/Redux** application and the back-end is an **expressJS** server with **MongoDB**.
- At the time of writing (7th April 2024), it has smoothly processed **130+** online bookings so far and both the business owner and the customers have given some positive feedback.

Front-end Web engineer (Remote), okTurtles Foundation Inc., Miami, Florida, the US

JUNE 2022 – PRESENT

- I worked on implementing the front-end of multiple websites/web-application of the company using various web front-end technologies (**Vue.js / React.js / Typescript / SASS, CSS / HTML5**).
- The majority of the tasks were to implement the design mock-ups the designer created for the various projects.
- I also worked on creating a **PWA** for the company's web-app named 'GroupIncome'.

Front-end web engineer, Heartland Bank LTD, Auckland, New Zealand

APRIL 2020 – PRESENT

- Worked mainly on maintaining the company's hybrid mobile-app built with **Vue.js/CapcitorJS**, which has 12,000+ user base.
- majority of the tasks were to implement the figma mock-ups created by the designers and integrate various RESTful APIs develered from the back-end team.
- Also worked on multiple other **Vue 3 / typescript** projects at the company.
- Have been receiving the salary increase **every year** since joining.

Education

Bachelor of Applied Science in Chemical Engineering, Hanyang University, Seoul, South Korea

MARCH 2010 – JULY 2025

Studied Chemical Engineering.
